Training Programme No. 10001153532

Limited
seats available
**GRAB YOURS
NOW!**

24 - 25 March 2022
2.00 p.m. - 5.30 p.m. (Malaysia Time)

ABOUT THE COURSE

Construction sites are exposed to various perils and exposures. Theft and physical loss of material, plant and machinery is a common occurrence faced at project locations.

There are various risk aspects involved in a project and some of these issues can be identified and managed. Insurance is a risk transfer mechanism. Risk management can be used as a mode to reduce certain exposure(s) on site.

The session will address some of the concerns of the underwriter when dealing with theft loss. Application of deductible and other restrictive clauses will be addressed.

The application of the CAR policy in relation to theft losses will be deliberated and expanded. The Course Leader will share some of the more his own project risk insurance cases to enable better understanding of this technical subject.

LEARNING OUTCOMES

At the end of the course, participants will be able to:

- Learn how insurance coverage for project sites are arranged and underwritten
- Know the concerns of underwriter when considering theft exposure
- Consider risk management steps to manage theft issues
- Appreciate how the risk transfer process takes place
- Highlight the key points of the CAR policy in relation to theft losses
